# Four Levels of FIRST

## K-12 PROGRAMS FOR KIDS

### **FIRST<sup>®</sup> LEGO<sup>®</sup> LEAGUE JR.**

Captures young curiosity by exploring real-world scientific challenges, learning teamwork, and working with motorized LEGO<sup>®</sup> elements

GRADES

K-4

[Learn More](#)

### **FIRST<sup>®</sup> LEGO<sup>®</sup> LEAGUE**

Elementary and middle school-aged students research a real-world engineering challenge, develop a solution, and compete with LEGO-based robots of their own design

GRADES

4-8

[Learn More](#)

### **FIRST<sup>®</sup> TECH CHALLENGE**

Teams of middle and high school-aged students are challenged to design, build, and program a robot to play a floor game against other teams' creations

GRADES

7-12

[Learn More](#)

### **FIRST<sup>®</sup> ROBOTICS COMPETITION**

High school-aged teams compete head to head on a special playing field with robots they have designed, built, and programmed

GRADES

9-12

[Learn More](#)

# FLL – What is FLL

*Ages vary by participating country*

From <http://droidecomunidad.com/wp-content/uploads/2014/09/LEGO-Mindstorms-EV3-Education-45544.jpg>

From <https://youtu.be/mbiH2tOKqoc>

# *FLL is Made up of Four Parts*

- **Mission Game** – Head to Head Robots on the Game Field
- **Robot Design/Programming** – Develop a Lego robot to play on the Mission Board
- **Core Values**- Work and Play using Gracious Professionalism & Cooperation!
- **Research** – A solution to a Real World Problem

# *Build a Robot*

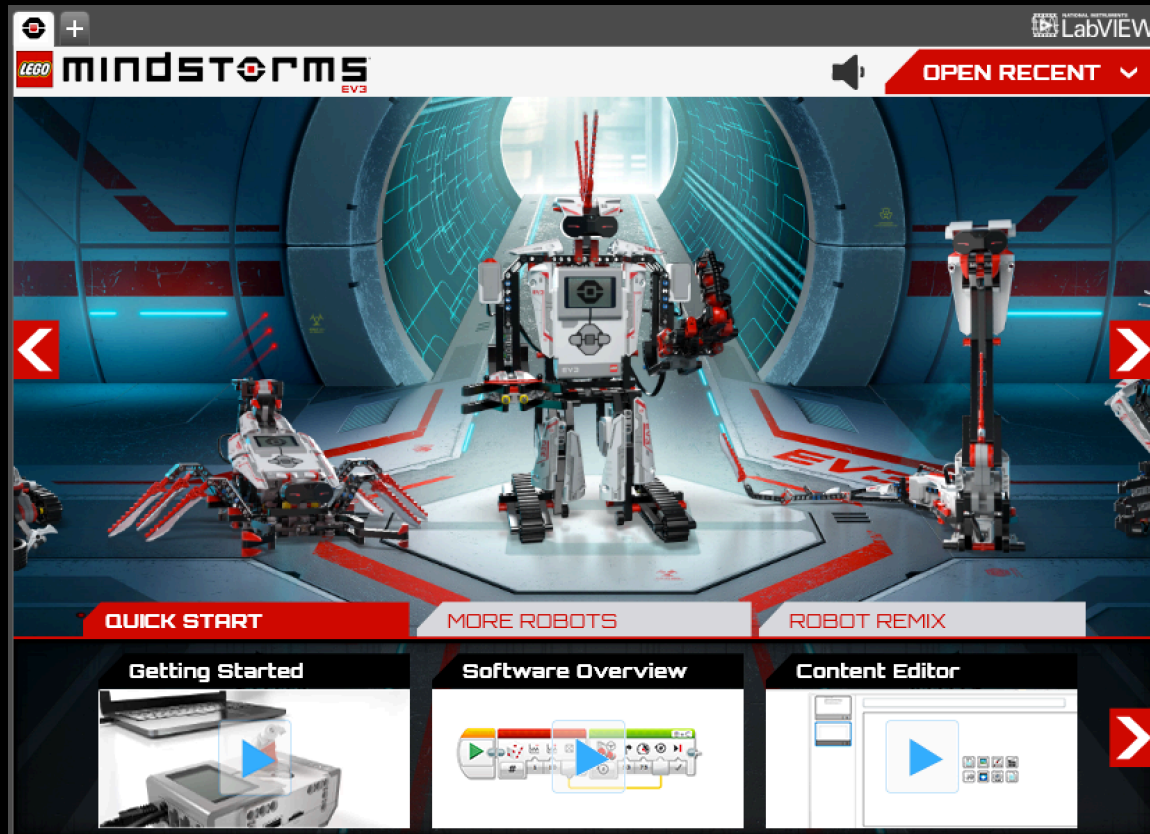

Use Lego EV3 Mindstorm Educational Kit

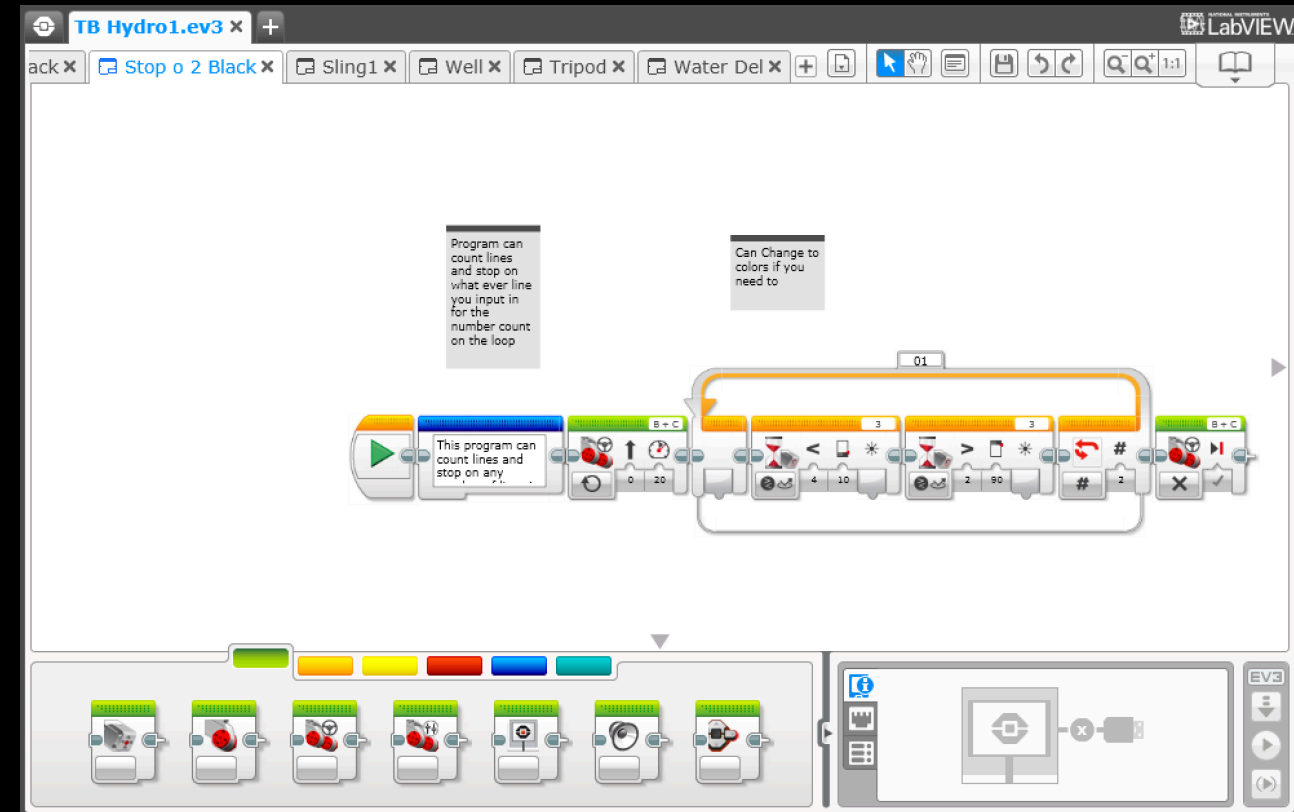

# Programming with Lego MindStorms

Drag and Drop Graphical Programming Language

# RDES – Robot Design/Programming

## Robot Design Executive Summary

An “executive summary” is often used by engineers to briefly outline the key elements of a product or project. The purpose of the Robot Design Executive Summary (RDES) is to give the Robot Design Judges a quick overview of your team’s robot and all that it can do.

From this....

[https://makerzone.mathworks.com/files/2014/07/lego-ev3-IMG\\_0994.png](https://makerzone.mathworks.com/files/2014/07/lego-ev3-IMG_0994.png)

# Mission Game

2 teams  
2.5 minutes  
Side-by-side competition

# Core Values

## The Core Values

The Core Values are the heart of *FIRST*® *LEGO*® League. By embracing the Core Values, participants learn that friendly competition and mutual gain are not separate goals, and that helping one another is the foundation of teamwork. Review the Core Values with your team and discuss them whenever they are needed.

- We are a team.
- We do the work to find solutions with guidance from our coaches and mentors.
- We know our coaches and mentors don't have all the answers; we learn together.
- We honor the spirit of friendly competition.
- What we discover is more important than what we win.
- We share our experiences with others.
- We display *Gracious Professionalism*® and *Coopertition*® in everything we do.
- We have FUN!

# Research – Real World Problem to Investigate

## The Project In-depth

### *Think About It*

People use water every day, but your team members probably don't think much about how and why they use water. Whether it's directly (drinking or washing) or indirectly (manufacturing the products they use or producing energy), they have a lot of different needs for water.

*Your team's Project challenge this season is to improve the way people find, transport, use, or dispose of water.*

## Robot Design

Team Number \_\_\_\_\_  
Judging Room \_\_\_\_\_

Directions: For each skill area, clearly mark the box that best describes the team's accomplishments. If the team does not demonstrate skill in a particular area, then put an "X" in the first box for Not Demonstrated (ND). Please provide as many written comments as you can to acknowledge each team's hard work and to help teams improve. When you have completed the evaluation, please circle the team's areas of strength.

	Beginning	Developing	Accomplished	Exemplary
<b>Mechanical Design</b>				
<b>Duration</b>	Evidence of structural integrity; ability to withstand rigors of competition			
N	quite fragile; breaks a lot	frequent or significant faults/repairs	rare faults/repairs	sound construction; no repairs
D				
<b>Mechanical Efficiency</b>	Economic use of parts and time; easy to repair and modify			
N	excessive parts or time to repair/modify	inefficient parts or time to repair/modify	appropriate use of parts and time to repair/modify	streamlined use of parts and time to repair/modify
D				
<b>Mechanization</b>	Ability of robot mechanisms to move or act with appropriate speed, strength and accuracy for intended tasks (propulsion and execution)			
N	imbalance of speed, strength and accuracy on most tasks	appropriate balance of speed, strength and accuracy on some tasks	appropriate balance of speed, strength and accuracy on most tasks	appropriate balance of speed, strength and accuracy on every task
D				

Comments:				
Programming	<b>Programming Quality</b>	Programs are appropriate for the intended purpose and would achieve consistent results, assuming no mechanical faults		
	N	would not achieve purpose	would not achieve purpose OR would be inconsistent	should achieve purpose repeatedly
	D			should achieve purpose every time
	<b>Programming Efficiency</b>	Programs are modular, streamlined, and understandable		
	N	excessive code and difficult to understand	inefficient code and challenge to understand	appropriate code and easy to understand
	D			streamlined code and easy for anyone to understand
Automation/Navigation	Ability of the robot to move or act as intended using mechanical and/or sensor feedback (with minimal reliance on driver intervention and/or program timing)			
	N	frequent driver intervention to aim AND retrieve robot	robot moves/acts as intended repeatedly with occasional driver intervention	robot moves/acts as intended every time with no driver intervention
	D			

Comments:					
Strategy & Innovation	<b>Design Process</b>	Ability to develop and explain improvement cycles where alternatives are considered and narrowed, selections tested, designs improved (applies to programming as well as mechanical design)			
	N	organization AND explanation need improvement	organization OR explanation need improvement	systematic and well-explained	systematic, well-explained and well-documented
	D				
	<b>Mission Strategy</b>	Ability to clearly define and describe the team's game strategy			
	N	no clear goals AND no clear strategy	no clear goals OR no clear strategy	clear strategy to accomplish the team's well-defined goals	clear strategy to accomplish the team's well-defined goals
	D				
	<b>Innovation</b>	Creation of new, unique, or unexpected feature(s) (e.g. designs, programs, strategies or applications) that are beneficial in performing the specified tasks			
	N	original feature(s) with no added value or potential	original feature(s) with some added value or potential	original feature(s) with the potential to add significant value	original feature(s) that add significant value
	D				

Comments:	
<b>Strengths:</b>	<b>Mechanical Design</b> <b>Programming</b> <b>Strategy &amp; Innovation</b>

## Core Values

Directions: For each skill area, clearly mark the box that best describes the team's accomplishments. If the team does not demonstrate skill in a particular area, then put an "X" in the first box for Not Demonstrated (ND). Please provide as many written comments as you can to help teams improve. When you have completed the evaluation, please circle the team's areas of strength.

	Beginning	Developing	Accomplished	Exemplary
<b>Discovery</b>	Balanced emphasis on all three aspects of the FIRST LEGO League; it's not just about one aspect; others respected			
N	emphasis on only one aspect; others neglected	emphasis on two aspects; one aspect neglected		
D				
<b>Team Spirit</b>	Enthusiastic and fun expression of the team's identity			
N	minimal enthusiasm AND minimal identity	minimal enthusiasm OR minimal identity	fun; clear identity	enthusiasm & fun; clear identity
D				
<b>Integration</b>	Application of FIRST LEGO League values and skills outside FIRST LEGO League (ability to describe current and potential examples from daily life)			
N	team does not apply values and skills outside FIRST LEGO League	team able to describe at least one example	team able to describe multiple examples	team able to describe multiple examples; not individual stories
D				

Comments:					
Teamwork	<b>Effectiveness</b>		Problem solving and decision making processes help team achieve their goals		
	N	team goals AND team processes unclear	team goals OR team processes unclear	clear team goals and processes	clear processes enable team to accomplish well-defined goals
	D				
	<b>Efficiency</b>		Resources used relative to what the team accomplishes (time management, distribution of roles and responsibilities)		
	N	limited time management AND unclear roles	limited time management OR unclear roles	excellent time management and role definition allows team to accomplish most goals	excellent time management and role definition allows team to accomplish all goals
	D				
	<b>Kids Do the Work</b>		Appropriate balance between team responsibility and coach guidance		
	N	limited team responsibility AND excessive coach guidance	limited team responsibility OR excessive coach guidance	good balance between team responsibility and coach guidance	independence with minimal coach guidance
	D				

Comments:					
		<b>Inclusion</b> Consideration and appreciation for the contributions (ideas and skills) of all team members, with balanced involvement			
N	unbalanced team involvement AND lack of appreciation for contributions	unbalanced team involvement OR lack of appreciation for contributions	balanced team involvement AND appreciation for contributions of all team members	balanced team involvement AND appreciation for contributions of all team members	
		<b>Respect</b> Team members act and speak with integrity to others; feel valued—especially when solving problems or resolving conflicts			
N	not evident with majority of team members	evident with majority of team members	almost always evident with all team members	always evident, even in the most difficult situations	
		<b>Cooperation</b> Team competes in the spirit of friendly competition and cooperates with others			
N	not evident with majority of team members	evident with majority of team members	almost always evident with all team members	always evident, even in difficult situations—and team actively helps other teams	

Comments:	
<b>Strengths:</b>	<b>Inspiration</b> <b>Teamwork</b> <b>Gracious Professionalism</b>

# FLL Tournament Rubrics

## Project

Team Number \_\_\_\_\_  
Judging Room \_\_\_\_\_

Directions: For each skill area, clearly mark the box that best describes the team's accomplishments. Teams should demonstrate everything at the level. If they are missing part, mark the level below. If the team does not demonstrate an area, put an "X" in the first box for Not Demonstrated (ND). Please provide as many written comments as you can to acknowledge each team's hard work and to help teams improve. When you have completed the evaluation, please circle the team's areas of strength.

	Beginning	Developing	Accomplished	Exemplary
<b>Research</b>				
<b>Problem Identification</b>	Clear definition of the problem being studied			
N	unclear; few details	partially clear; details missing	mostly clear; detailed	clear; very detailed
D				
<b>Sources of Information</b>	Quality and variety of data/evidence and sources cited			
N	minimal quality; variety limited	quality OR variety need improvement; did not include professional(s)	sufficient quality and variety; included professional(s)	extensive quality and variety; included multiple professionals
D				
<b>Problem Analysis</b>	Depth to which the problem was studied and analyzed by the team, including extent of analysis of existing solutions			
N	minimal study; no analysis	minimal study; some analysis	sufficient study and analysis	extensive study and analysis
D				

Comments:				
Innovative Solution	<b>Team Solution</b> Clear explanation of the proposed solution and description of how it solves the problem			
	N	difficult to understand	some parts confusing	understandable
	D			easy to understand by all
	<b>Innovation</b> Degree to which the team's solution makes life better by improving existing options, developing a new application of existing ideas, or solving the problem in a completely new way			
	N	existing solution/application	suboptimization contains some original element(s)	original suboptimization; potential added value
Innovative Solution	<b>Solution Development</b> Systematic process used to select, develop, evaluate, test, and improve the solution (implementation could include cost, ease of manufacturing, etc.)			
	N	process AND explanation need improvement	process OR explanation need improvement	systematic process included evaluation
	D			systematic process included evaluation; implementation consistent

Comments				
Presentation	<b>Sharing</b> Degree to which the team shared their Project before the tournament with others who might benefit from the team's efforts			
	N	shared within the team and/or relatives	shared once outside the team	shared with one audience who may benefit OR one professional
	D			shared with multiple audiences who may benefit OR multiple professionals
	<b>Creativity</b> Imagination used to develop and deliver the presentation			
	N	minimally engaging OR unimaginative	engaging OR imaginative	engaging AND imaginative
	D			very engaging AND exceptionally imaginative
	<b>Presentation Effectiveness</b> Message delivery and organization of the presentation			
	N	unclear OR disorganized	partially clear; minimal organization	mostly clear; mostly organized
	D			clear AND well organized

Comments:	
<b>Strengths:</b>	<b>Research</b> <b>Innovative Solution</b> <b>Presentation</b>

\*Required for Award Consideration

## The Robot Game

- Solve the Robot Game Rules in the Challenge Guide: <http://www.firstlegoleague.org/challenge>
- Identify one or more Missions to solve
- Design a robot using LEGO® MINDSTORMS® that can solve the Mission(s)

Missions as written below are only an overview. For full details, read the Challenge Guide.

Note: \*Asterisks tell you a specific METHOD is required, and must be observed by the referee. Unlabeled conditions must be visible at the END of the match.

**M01 - PIPE REMOVAL**  
Move the longest Pipe to its goalpost in 30 seconds. 20 Points

**M02 - FLOW**  
Move a Big Water pipe into its goalpost in 30 seconds. 20 Points

**M03 - PUMP ADDITION**  
Move the Pump Addition to its goalpost in 30 seconds. 20 Points

**M04 - RAIN**  
Move a Rain pipe into its goalpost in 30 seconds. 20 Points

**M05 - FILTER**  
Move the Filter into its goalpost in 30 seconds. 20 Points

**M06 - WATER TREATMENT**  
Move the Water Treatment into its goalpost in 30 seconds. 20 Points

**M07 - FOUNTAIN**  
Move the Fountain into its goalpost in 30 seconds. 20 Points

**M08 - MANHOLE COVERS**  
Move the Manhole Covers to their goalposts in 30 seconds. 20 Points

**M09 - TRIPPOD**  
Move the Tripod into its goalpost in 30 seconds. 20 Points

**M10 - PIPE REPLACEMENT**  
Move the Pipe Replacement into its goalpost in 30 seconds. 20 Points

**M11 - PIPE CONSTRUCTION**  
Move the Pipe Construction into its goalpost in 30 seconds. 20 Points

**M12 - SLUDGE**  
Move the Sludge into its goalpost in 30 seconds. 20 Points

**M13 - FLOWER**  
Move the Flower into its goalpost in 30 seconds. 20 Points

**M14 - WATER WELL**  
Move the Water Well to its goalpost in 30 seconds. 20 Points

**M15 - FIRE**  
Move the Fire into its goalpost in 30 seconds. 20 Points

**M16 - WATER COLLECTION**  
Move the Water Collection into its goalpost in 30 seconds. 20 Points

**M17 - SLINGSHOT**  
Move the Slingshot into its goalpost in 30 seconds. 20 Points

**M18 - FAUCET**  
Move the Faucet into its goalpost in 30 seconds. 20 Points

The Robot Game Missions can provide real-world examples for your Project research. Learn about the stories behind the Missions in the Challenge Guide: <http://www.firstlegoleague.org/challenge>

**PENALTIES:** Before the match starts, the Ref removes the six red Penalty discs from the Field, and holds on to them. If you interrupt the Robot, the Ref places one of the removed Penalties in the white triangle in the southeast, as a permanent, unscheduled Interruption Penalty. You can get up to six such penalties, worth -5 Points EACH.

# *What is Robotics at SAS?*

# Why FIRST.....

- Teachers can be coaches, mentors, space providers, and so much more as we assist students with tools to ....  
*Imagine and Dream*

Students and Teachers can work/learn together

NASA Robotics: <https://robotics.nasa.gov/index.php>

The screenshot shows the Carnegie Mellon Robotics Academy website. The header includes the logo and navigation links for EDUCATORS, VEX, LEGO, and CURRICULUM. A secondary navigation bar lists GETTING STARTED, TEACHER TRAINING, CURRICULA, SOFTWARE, and COMPETITIONS. The main content area features a 'Teacher Training' section with a circular icon of a person at a computer. Below this is a table with training options: ALL TRAINING (highlighted), ON-SITE TRAINING AT NREC, and ONLINE TRAINING. To the right, the text 'All available Training' is displayed. Further down, the 'On-site Training Schedule' is listed, including dates for June 11th-15th, 2018, July 9th-13th, 2018, and July 30th-August 3rd, 2018. A link to 'Click here for more details...' is provided. A small image of a LEGO Mindstorms EV3 robot is also visible.

The screenshot shows the NASA Robotics Alliance Project website. The header features the NASA logo and the text 'NATIONAL AERONAUTICS AND SPACE ADMINISTRATION'. A link to '+ NASA Home Page' is visible. The main content area is titled 'The Robotics Alliance Project' and includes a collage of images showing various robotic projects, including a rocket launch, a LEGO Mindstorms EV3 robot, and a custom-built robot. Below the collage are four navigation links: + HOME, + EVENTS, + EDUCATORS, and + STUDENTS.

No clarifying vision or end goal  
Do we know what our stake holders want  
We don't have infrastructure / materials to support  
Logistical ramification of SAS experience  
We have money now, what about later  
Need to build and develop knowledge and skills with our stakeholders  
No continuity between divisions  
Time  
Kids have an interest, but there is no pathway  
Our model is opt in and our kids are busy  
Parents, Teachers, Students have a narrow understanding of What Is Robotics  
Lack of Oversight or Leadership  
Not part of PK – 12 experience  
Gap or lack of instruction  
Just ASAs  
No real subject comprehensive / reflective  
Materials  
Present module is backwards  
Lack of diversity in participation  
Lack of teacher capacity  
Next practices – there are few models to learn from  
Feels like an add on  
What does the school want

# Challenges

Overarching Problems  
Vision goal school  
Articulated  
Curriculum/integration/shared  
responsibility  
Bridge – transition - Lack of  
intentionality  
Prof Development  
Need a Mind Shift change  
Value

# *Questions to ask ourselves?*

How do we define robotics for SAS ?

<https://blog.robotiq.com/whats-the-difference-between-robotics-and-artificial-intelligence>

What does that look like developmentally?

What does a SAS graduate with robotic learning know how to do?

## Robotics in the Future for SAS

- Money into Personnel, Materials, Curricular structure
  - What that looks like, not sure????
- Aim-to have robotics and engineering integrated into the K-12 curriculum which provide students the opportunities to advances on the world stage.

- **Money into Personnel, Materials, Curricular structure**
  - **What that looks like, not sure????**
- **Aim-to have robotics and engineering integrated into the K-12 curriculum which provide students the opportunities to advances on the world stage.**

## Future of SAS Robotics

***What we hope is that we will have a PK-12 robotics program that is integrated into the curriculum at all grade levels so that students can develop and pursue their dreams and if desired compete on the world stage.***
